

Allot at a Glance

About Allot

Allot Communications (NASDAQ: ALLT) is a leading provider of intelligent IP service optimization solutions for DSL, wireless and mobile broadband carriers, service providers, and enterprises. Allot's rich portfolio of hardware platforms and software applications utilizes deep packet inspection (DPI) technology to transform broadband pipes into smart networks that can rapidly and efficiently deploy value added Internet services. Allot's scalable, carrier-grade solutions provide the visibility, security, application control and subscriber management that are vital to managing Internet service delivery, guaranteeing quality of experience (QoE), containing operating costs, and maximizing revenue in broadband networks.

Founded

The company was founded in 1996 and was listed on the NASDAQ Global Market under the ticker symbol ALLT in 2006.

Markets

Allot solutions are designed for broadband and Internet service provider networks including DSL, cable, mobile, satellite, WiFi, WiMAX carriers; and enterprise WANs in all sectors, including education, manufacturing, retail, finance, healthcare, transportation, and government.

Sales

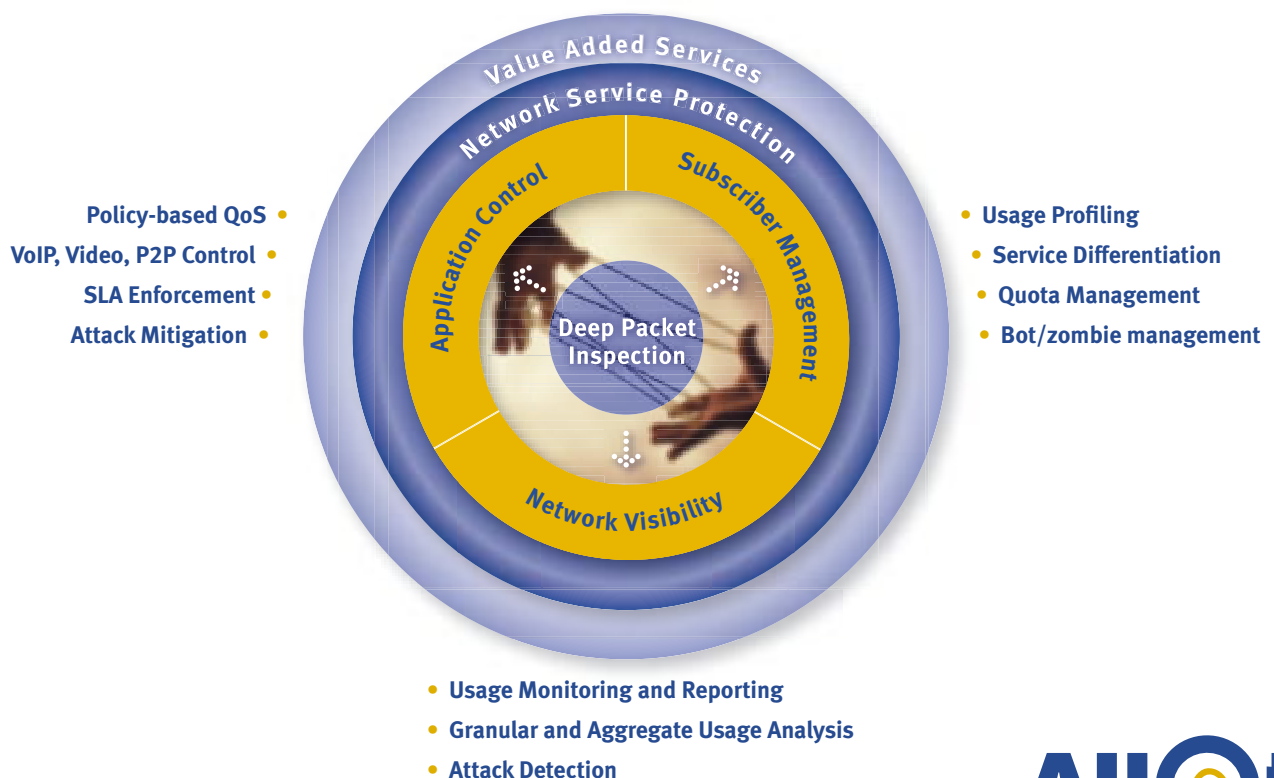

The company sells and markets its products through a dedicated sales force and worldwide OEM and distribution channels supported by technical support personnel in each region.

Customer Support

Worldwide coverage 24/7

Value Proposition

Intelligent IP Service Optimization

Product Portfolio

Allot Service Gateway, Omega Series

Built to AdvancedTCA® standards and based on Allot's leading deep packet inspection (DPI) technology, Allot Service Gateway allows broadband service providers to inspect, monitor and control network traffic on multiple 10-Gigabit Ethernet links and to deploy revenue-generating DPI-based services in one integrated platform.

	Open architecture	Enabling integration of multi-vendor services; Linux support
	Carrier class platform	ATCA chassis/blades; high availability; full redundancy
	Scalable performance	2-4 x 10GE ports; 5-25 Gbps throughput; via modular blades
	Multiple services	Service applications leveraging DPI
	Investment Protection	Easy upgrade with re-use of current chassis/blades

NetEnforcer Bandwidth Management Devices

Allot NetEnforcer devices inspect, monitor and control network traffic per application and per subscriber, enabling intelligent optimization of broadband and WAN services.

	NetEnforcer AC-400	NetEnforcer AC-800	NetEnforcer AC-1000	NetEnforcer AC-2500
Models				
	AC-402 AC-404	AC-802 AC-804 AC-808	AC-1010 AC-1020 AC-1040	AC-2520 AC-2540
Maximum Throughput	100 Mbps full duplex	310 Mbps full duplex	1 Gbps full duplex	2.5 Gbps full duplex
Ethernet Ports	2 x 10/100 Mbps or 2 x 10/100 Mbps + 2 x 10/100/1000 Mbps	2,4,8 x 10/100/1000 Mbps	2 or 4 x 1 Gbps 8 x 100 Mbps	4 or 8 x 1 Gbps
Max Connections/Flows	96K / 192K	256K / 512K	1M / 2M	2M / 4M
Subscribers Managed	N/A	N/A	100,000*	160,000*
QoS Control Level	2, 6, 10, 45, and 100 Mbps	45, 100, 155 and 310 Mbps	155, 310, 622 Mbps and 1 Gbps	310 Mbps and 1, 2, 2.5 Gbps

*Requires Allot Subscriber Management Platform

NetXplorer Management System

Allot NetXplorer is the management umbrella for Allot products, providing dynamic centralized reporting, provisioning, alerting and policy-based QoS control of all network traffic.

Real-time Reporting Historical Reporting Managed Services Reporting Accounting	
---	---

Subscriber Management Platform (SMP)

By providing per-subscriber visibility and policy control, Allot SMP enables the provisioning and management of tiered subscriber services and quota-based usage plans.

ServiceProtector

Allot ServiceProtector ensures service continuity and guards network integrity against known and unknown threats. Through immediate identification of Denial of Service (DoS/DDoS) attacks, Zero Day attacks, worms, zombie and spambot behavior, ServiceProtector enables fast, surgical mitigation of offending traffic while allowing legitimate traffic to flow.
